13. Miscellaneous

As can be noted from the details presented above, during the past years my academic interests alongside my accumulating professional experience has shifted from the field of Psychoneuroimmunology to Forensic Psychology.

During this significant change I have developed new courses based on the gained expertise and renewed some interesting research projects in the field of forensic psychology. Unfortunately, during some of these years- in specific intervals-, I wasn't allowed to take part in researches and my professional fieldwork could not enable me to peruse the goals I have set in researching my new field of interest.

I have retired from my formal duties as an officer in the security forces in January 2015 and have become a full time researcher & Lecturer at The Ruppin Academic center. I am currently involved in three independent research projects that seem to be extremely fruitful and intend to continue to invest all me efforts in my Academic path.
