1. Arviv, Tamir and Efrat Eizenberg (under review). "A new form of public space? interaction across ethnic divides in a High-rise Residential Complex's park." Accepted to Landscape and Urban Planning.

L. Summary of my Activities and Future Plans

My main research directions lie at the intersections of planning, urban design, community outreach, and sustainable development. My current research interest broadly centers around two main topics:

1. The development of planning processes and practices for building long-term urban resilience in Israel, including the regulation of building design, and creating mechanisms for citizen participation.
2. The relations between urban renewal projects, social mobility and sustainability.
